

SD-WAN SUMMIT 2017 SECOND EDITION ANNOUNCING THE AGENDA

The SD-WAN Summit will take place from the 26th to 28th September 2017 in Paris CDG. Upperside is pleased to announce the agenda of the second edition.

The 2017 agenda : technological challenges, operators and enterprises case studies, security and management issues

The EANTC Workshop

The conference starts with a workshop addressed by the EANTC. This session covers key SD-WAN design requirements, solution parameters, implementation pitfalls, based on test results and live demo.

Conference technical sessions

Renowned experts will address the main remaining technical challenges:

- SD-WAN technical implementation options
- service capabilities and consumption application recognition and classification
- performance monitoring and traffic steering
- Security and scalability issues
- Management and orchestration
- Future directions

Telco deployment experiences session

- What are the organisational challenges for telcos ?
- What are their main technological challenges and how they are addressed?
- Does SD-WAN need a standard? At least, interop between SD-WAN solutions supporting SP off net scenarios?

Hear testimonies from **Verizon, Orange, BT, Colt, Telia, Telstra, Telefonica and Exponential E**

Enterprises expectations

Enterprise representants (**Interroll, Carrefour**) will describe their current deployment challenges in terms of performance, orchestration, VNF implementation, etc.
