

5G & Universal Access Congress

18-20 September 2018 | London, UK

Layer123 are pleased to launch a new professional knowledge exchange for the 5G network innovation industry taking place in London, UK this September.

The three-day congress will bring together the leading organisations and individuals driving innovation in carrier networks to support the requirements of the next generation of seamless, high-speed fixed and mobile - 5G services and meet the target of Universal Access, irrespective of geographic location and terrain.

The congress agenda will feature 5G Core & Access, Network Slicing, new vRAN, TIP OpenCellular, mmWave (TIP and ETSI), new Backhaul, Crosshaul and Universal Access, to name a few topics.

For more on the 5G & Universal Access Congress, visit the event website at www.layer123.com/5g
