

NFV & Zero Touch World Congress

24-27 April 2018 | DoubleTree Hilton, San Jose, USA

With NFV and the transformation to a virtualised networking platform now well underway at Carriers - and already extant at Cloud providers - the stage is now set for further transformation.

With a strategic vision of Zero Touch, both Carrier and Cloud providers have an objective of full network and services Automation.

Such a vision will propel the industry forward into the next phase, and help ensure that the future network will be fit for purpose - **meeting the fast-moving demands of the Digital Enterprise** and fully leveraging the benefits of NFV+SDN. Why not join us in San Jose in April for the expanded NFV & Zero Touch World Congress.

For more information on NFV & Zero Touch World Congress, visit the event website at www.layer123.com/nfv

We look forward to seeing you there!
