

The MVNOs Series are the only events dedicated to the MVNO industry. From the 23rd to the 26th of April, the MVNO community will come together for 4 days of learning and networking in Madrid, with industry leading companies and thought leaders at **MVNOs World Congress 2018**. New for this year, we have introduced 3 tracks focusing on MVNO Disruptors, MVNO Innovators and Wholesale as a Service. The event proves to be more insightful than ever with an agenda packed full of learnings. Make sure you [download the brochure now](#) to see the hot topics for 2018. [Book your ticket](#) before the 9th of March and **save up to €249.00**.

ABOUT MVNO WORLD CONGRESS

The MVNO market continues to grow and so does the MVNOs World Congress! To reflect the changes in the telco market and increasing convergence between different technologies and services, the event will now consist of more content than ever with dedicated tracks for MVNOs in IoT, eSIM and Wholesale. With over 240 MVNOs in attendance from 80 different countries and 130 speakers, this promises to be the biggest and most global event yet.

Taking place over four days, the event is engineered to ignite innovation and accelerate growth in the MVNO space through several formal and informal sessions focused on ideas brainstorming, co-operation, problem solving and networking. To name just a few new interactive sessions the programme will now include Pecha Kucha presentations, fireside chats, user demos and much more.
