[Telecoms World Asia](#) is a platform where the industry’s leaders can meet, exchange ideas and discuss strategies that will set the course for the telecom businesses for the next decade.

For 2020, we’ve put together an agenda that addresses the key issues that operators are facing today, classified under 5 key themes – Wholesale Carriers, Network Virtualisation, Telco 4.0, 5G and new for 2020, Intelligent Connectivity – with the focus on Intelligent Connectivity in Asia running through the sessions. Come March 2020, we look forward to exciting debates as we welcome over 1000 attendees from Asia Pacific’s telecoms industry and beyond in one of the region’s fast-developing markets – Bangkok, Thailand.
