## **SECURITY AND SAFETY TECHNOLOGIES XVII International Forum**

SECURITY AND SAFETY TECHNOLOGIES XVII International Forum (SST Moscow) is the major event for exhibitors, visitors, purchasers and government involved in the security community in Russia, introduces a dedicated promotional campaign for new security products, services, brands, and installations. Multiple opportunities are available for all the exhibitors.

The SST will take place February 14–17, 2012 at Crocus Expo (Moscow, Russia)

A traditional networking event for security suppliers and the largest end-users in Russia, SST Moscow 2012 is the major display for security innovations, best of which will be nominated for SST Award 2012

Russian market in security technologies is growing constantly. More than 20% annual growth has been reported during last years, which have been difficult for any other businesses. In 2008 the volume of only video observation section extended to 2 billion USD

Our exhibitors are 215 largest producers and suppliers of safety solutions from more than 10 countries all over the world. The Business Programme includes 42 seminars, conferences and round tables, organized in collaboration with market leaders and state industry agencies.

This year among our exhibitors you would be able to see the RosCosmos and the Federal Security Agency (FSB).

In Russia there are no any other event which would provide such a balanced attendance of main elements of security market: Suppliers, Producers, End-users, Officials, Large business program. The SST Organizer Committee includes heads and representatives of Federal Agency for Ecological, Technical and Nuclear Supervision; Association of Russian Banks; Transport Association; Ministry of Culture; Ministry of Emergency.

**Groteck**  
Business Media

The highly informative, and carefully structured SST Moscow 2012 environment allows to demonstrate technology advantages thoroughly and reach the customers, making them well-informed even before the show opens. Newly created on-line registration system, GroteckSmartEvent, would be available first in a lifetime. It will guide visitor through the intensive and eventful business programme.
